PROGRAM

devoted to the 140th anniversary of the birth of OM Marzieiev

October 19, 2023

Kyiv

Dear conference participants!

We sincerely invite you to take part in 19 Marzeiev readings, which are dedicated to the 140th anniversary of OM Marzeiev's birth.

Oleksandr Mykytovych Marzeiev is the doctor a capital letter for which sanitation and hygiene were the meaning of life.

It was a prominent scientist, organizer of the sanitary and epidemiological service of Ukraine. In 1931 on the initiative of OM Marzeiev and with his active participation, the first research institute of communal hygiene was created in Ukraine, which he headed for the rest of his life. It was here that scientists started a new direction of hygienic science, formulated its purpose and main tasks.

And for over 90 years - students and followers of a prominent scientist continue to develop their teacher's ideas in accordance with the needs of time.

We invite you to participate in the discussion and exchange of experience of research and practical work. We wish inspiration, perseverance in our field of activity in favor of independent Ukraine!

Best regards
